Cockspur Handle >>>

The most basic type of window handle. The handle "nose" secures over a wedge on the frame to seal and secure the window.

Inline Espag Handle >>>

A window handle that drives a square spindle to operate an espagnolette or shootbolt locking system. These are the most common type of window handle currently fitted to UPVC windows. As its name suggests, this type of handle design is straight or "inline".

Cranked Espag Handle >>>

A window handle that drives a square spindle to operate an espagnolette or shootbolt locking system. These are the most common type of window handle currently fitted to UPVC windows. The levers of cranked window handles are offset to either the left or right to improve handle clearance. As the handles are offset this means that they are handed either left or right.

TBT Handle >>>

A window handle designed specifically for tilt before turn (TBT) or turn-first (TNT) windows.

Operates in 3 distinct positions

1. Closed position

2. Tilt position

3. Turn position

Handing Cranked Window Handles >>>

Cranked window handles are 'handed' left and right.

If the handle grip is offset to the left it is a 'left hand' handle. Likewise if the handle grip is offset to the right it is a 'right hand' handle.

Side hung, viewed internally

Top hung, viewed internally

Pin Lengths >>>

The espag handle pin length required will usually be dictated by the window framing system.

To measure the pin length of an existing handle, measure from the base of the rose to the end of the spindle.

Pin lengths generally range from 9mm - 55mm.

Keying Terminology

Our specialist staff within our in-house workshop facility are able to offer master keyed systems to suite all requirements and budgets. We can create and assemble cylinders to suit the most complex and secure systems within a few days from receipt of order. We are also able to build cylinders to work on the same key for a front and back door application.

Should you have a requirement to supply cylinders or keys to an existing master keyed system, please contact a member of our Specials Department who will be happy to assist.

Our highly skilled key cutting staff are also able to supply extra keys to pattern or to code within 48 hours from receipt of order. To assist in understanding keying terminology, we have produced the simple guide below. If you would like further assistance or would like to discuss your specific requirements please contact us and our dedicated team will be happy to help.

To Differ >>>

To Differ - a lock or cylinder that works with its own keys i.e - a front door.

Front Door

Keyed Alike >>>

Keyed Alike (also known as To Pass) - two or more locks or cylinders made to operate on the same key, i.e - a front and back door.

Front Door

Back Door

Master Keying >>>

All the locks or cylinders have their own key (and cannot open any other lock or cylinder) but a master key will open them i.e. an office or small factory.

Office 1

Office 2

Office 3

Office 4

Office 5

Master Key

Grand Master Key >>>

Grand master key - similar to a master keyed system but can be sub grouped to offer greater key control. For example, a hotel would normally be on a grand master key system. The owner (or manager) would have a grand master key to open all the locks. The Entertainment Manager would have a sub master key to open the doors that they are responsible for and the House Manager would have a sub master key for the bedrooms. Neither can gain access to the others areas but the owner (or manager) can access all the doors.

**Communal Entrance >>>**

A communal entrance or common entrance - usually an apartment block where all the individual apartments have their own key and will not open anything else apart from the main entrance of the building. It is possible to offer a common entrance cylinder as part of a master keyed system.

Lever/Lever Door Handles >>>

Lever handle both internally and externally are generally for use with standard multi point door locks. Standard door handles are often manufactured from aluminium or zinc and are available in a range of colours.

High Security Door Handles >>>

High security door handles meet the enhanced security requirements of PAS24 and Secured by Design. They provide superior strength and protection against common types of forced entry.

Lever/Pad Door Handles >>>

Lever handle internally and pad handle externally are generally for use with "twin spindle" door locks. Standard door handles are often manufactured from aluminium or zinc and are available in a range of colours.

Identifying the length of backplate required

The multi point locking system being used will dictate the size and type of door handle fitted.

Measure the lockcase (see door lock page) and select a handle with screw fixings that secure either through the lock or on either side of the lockcase.

If you have an existing handle available measure the overall length of the backplate and note the position and number screw fixings. See diagrams below. There are two common variants of door handles - A & B. See below.

A Variant

Two screw fix backplates, usually 220mm in length. Lever/Lever versions can be used with most standard PZ92 multi point door locks.

B Variant

Two screw fix backplates, usually 240mm in length.

PZ Distance

The PZ dimension is the distance from the centre of the handle spindle hole to the centre of the cylinder. The most common PZ distance is 92mm. See drawings A and B above.

Stack Height

The standard stack heights for friction stays are 13mm and 17mm. To measure the stack height of friction stay:

1. Fully close the friction stay so that all of the arms are stacked on top of each other. See image.
2. Measure from the bottom arm of the stay to the top arm. This measurement is the stack height.

Friction Stays >>>

Friction stays, or friction hinges, hinge the window to allow it to open and close. Fitted in pairs, they are positioned at either the top and bottom or left and right sides of a window.

Standard Friction Stay >>>

Standard stays are for use on side hung and top hung casement windows.

Egress Friction Stay for Emergency Exit >>>

Friction stays with a wide opening angle for emergency egress. They allow casement windows to satisfy the emergency egress requirements of Approved Document B of the building regulations. Egress friction stays often have colour coded end caps, for example in green, for easy identification.

Restricted Friction Stay >>>

Friction stays with a built-in restrictor to restrict window opening to a maximum of 100mm for child safety.

A 'quick release' lever enables cleaning and ventilation, relocating automatically when window is closed.

A guide to identifying Door Locks

Locking and Sealing Point Configuration >>>

Depending upon the level of security required various configurations of locking and sealing points are used.

Latch - Reversible for right or left hand doors.

Deadbolt

Roller Cam - Adjustable to ensure optimum weather sealing.

Mushroom Cam - Anti-separation device, adjustable for weather sealing.

Hook & Pin - Strong anti-separation and anti-lift combination.

Hook - Anti-separation device. Locks in either an upward or downward direction and secures behind striker.

Pin - Anti-lift bolt protected.

Shoot Extensions - Can be added top and bottom to specific door locks to enhance security of residential doors or for use on master or slave leaf of french door set.

Door lock Application and Type >>>

Common applications for multi point door locks include:

Residential Doors >>>

Multi point locks for use on front or back doors. These multi point locks feature various combinations of locking points, from basic 4 roller locks to enhanced security hook locks.

French Door Master Leaf >>>

Multi point locks designed for use on the master leaf of a pair of french doors. These locks often feature the same locking point combinations as standard residential door locks but can have shootbolts added top and bottom - highly recommended when used on french doors.

French Door Slave Leaf >>>

Multi point locks designed for use on the master leaf of a pair of french doors. Slave locks are fitted behind a french door dummy mullion and have shootbolts fitted top and bottom. Fitting a slave lock provides enhanced security when compared to finger bolts and maintains the symmetry of the door as two sets of handles are fitted.

Stable Doors >>>

Multi point doors are becoming increasingly popular as an alternative to traditional residential doors - particularly as a rear or kitchen back door. Stable door locking systems allow the top half of the door to be opened for ventilation, or the whole door to open for access.

Panic Doors >>>

Multi point locks designed for use on panic doors. These multi point locks are operated internally via panic bars or pads for safe, simple egress in case of emergency.

Sizing >>>

Faceplate Width

The standard faceplate (A) width for multipoint locks is 16mm, although some locks are available with a 24mm U-track faceplate. Typically, composite door faceplates are 20mm.

Backset

The backset dimension (B) is the distance from the gearbox faceplate to the centre of the square spindle hole. Backset dimensions will generally be either 35mm for PVCU doors or 45mm for composite or timber doors.

PZ

The PZ dimension (C) is the distance from the centre of the handle spindle hole to the centre of the cylinder. The most common PZ distance is 92mm although this can vary depending on lock manufacturer and lock function i.e twin spindle locks.

The positions of the security points, i.e. the rollers, is measured from the spindle to the rollers, or as close to the centre of the hook/deadbolt case as possible.

Key

- (A) Faceplate
- (B) Backset dimension
- (C) PZ dimension

Letterboxes >>>

Letterboxes are typically available in 2 standard widths - 10" and 12" and in either standard or slimline height, all of which are designed to accept A4 size letters.

To suit a range of door thicknesses, letter boxes are available in telescopic sizes - usually 20/40 and 40/80 - which fix together from either side of a door. Screw fixings are located on the internal half of the letterbox.

Other options include:

Standard Letterbox >>>

- Extruded aluminium flap.
- External and internal plastic frames.
- External foam weather sealing & internal nylon brush sealing.
- Torsion bars operate flaps.

Premier Letterbox >>>

- Zinc alloy flap and frame, internally and externally.
- External foam weather sealing.
- Internal nylon brush weather sealing.
- Concealed, spring flap operating mechanism.
- Internal and external finger recess for ease of use.

Nylon Brushes

Finger Recess

Slimline Letterbox >>>

- 38mm - 50mm aperture height.

Letterbox Security >>>

Manufactured from aluminium, a letterbox cowl locates around an existing letterbox on the internal side of a door to provide enhanced door security by limiting the opening angle of internal letterbox flap.

This effectively reduces vulnerability to "letterbox fishing" whilst still accessible for post.

CURE YOUR UPVC HEADACHE

**UPVC
Retrofit**
made easy

chameleon® provides **fast
acting relief** for all your
UPVC related headaches

chameleon® adaptable hardware is a range of retrofit products designed to suit UPVC or timber doors and windows. All products throughout the range have been designed with the speed and ease of fitting in mind, chameleon® isn't a 'like for like' product, but a solution to complete a job in one visit.

Centre Case - Overnight Locks

CHAMELEON Overnight Lock/Gearbox

Features

- Easy to fit
- Latch & Deadbolt
- 16mm Faceplate - Suitable for UPVC and composite doors
- Supplied with adjustable strike & packers
- Various locking point extension pieces available

Overview

This repair lock euro centre case can be used either stand alone as an overnight lock or as the central component of the Chameleon Modular Repair Lock System. It has a 16mm faceplate so is ideally suited for use on UPVC and composite doors.

Operation

A - Lift lever to engage locking mechanisms and then one full turn of the cylinder to lock. One full turn of the key then push down on the lever to unlock.

SOBINCO 8601 16mm Flat 92mm Centres Sashlock

Features

- Flat 16mm stainless steel faceplate
- Lock manufactured from non-corroding materials
- Successfully tested to EN 12209:2003/AS:2005
- Pivoting dead bolt
- Locking and unlocking by turning the key 360°
- Can be used both left and right handed by turning the latch bolt

Overview

The Sobinco 8600 series door locks are particularly narrow sashlocks which can be used both left and right handed by simply turning the latch bolt and incorporates a pivoting dead bolt rather than a sliding one. This type of bolt is longer than its conventional counterparts, making sure the same proportion of the deadbolt is integrated in the lockcase as is engaged in the frame which makes it extremely difficult for burglars to force entry. This lock is made from a non-corroding zinc alloy, has a 16mm wide flat stainless steel faceplate and a zinc alloy nickel plated latch & deadbolt. The Sobinco 8600 series sashlocks are tested in accordance with the European standard EN 12209:2003/AC:2005.

ADAMS RITE 4750 Mortice Euro Deadlatch Case

Features

- Latch is automatically deadlocked when door is in the closed position
- All faceplates and strike plates must be ordered separately
- Can be used in conjunction with the 7100 series Electric Strike to provide remote access control.
- Operates with 17mm Euro cylinder
- When used with 4596 paddle handle and 8461 strike range it complies with BS EN 179+A1:1998
- Suitable for use on aluminium doors.

Operation

The Adams Rite 4750 Deadlatch offers flexible traffic control and a good level of security.

ADAMS RITE MS4043 Cylinder Guard

Features

- Outer shield ring is bevelled to offer poor grip for twisting
- The hardened steel material combined with the bevelled shape makes obtaining a tight grip on the ring virtually impossible.
- The retainer plate on the back of the door prevents the cylinder being levered out in the event of a chisel type tool being driven into the stile behind the shield ring.

ALPRO 300mm Flush Bolt C/W Guide

Features

- Die cast zinc alloy operation mechanism
- Silver finish
- Complete with bolt guide
- Spring loaded floor sockets available on request
- Flat or radius profiles available

Overview

Flushbolts are used to facilitate the locking of the inactive leaf of a pair of aluminium, steel or timber doors. Complete with the necessary flushbolt guide and optional spring loaded floor sockets, the flushbolts allow both a secure and aesthetically pleasing locking solution.

ALPRO 5218 Screw-In Mortice Deadlock Barbolt Case

Features

- Deadlatches accept standard 1 5/32" screw-in key or thumbturn cylinder
- Hardened Steel Case
- 5 ply Laminated Steel Bolt
- Available in a variety of backsets

Overview

Round mortice cylinder deadlocks provide security deadlocking for a variety of aluminium doors including swinging and sliding applications.

The bolt is constructed from stainless steel and is a 5 ply laminated construction, with the centre core case hardened, complete with hardened roll pin to resist hacksaw attack. All deadlocks are designed to accept standard round mortice cylinders or thumbturns.

ALPRO Screw-In Mortice Deadlatch Case

Features

- Deadlatches accept standard 15/32" screw-in key or thumbturn cylinder
- Industry standard ANSI cut outs
- Latch hold back facility
- Designed to operate on doors with 3mm door gaps
- Supplied without faceplate
- Cam plugs are non handed (reversible in the field)

Overview

Round mortice cylinder deadlatches offer flexible control of situations and can be used in conjunction with Alpro's range of electric strikes to provide the added option of remote access control. The deadlatches can also be operated with the 459 paddle handle (cam plug required).

CHAMELEON All In One Repair Kit 2 Hook & 2 Roller, 2 Mushroom & 2 Roller + Keeps

Features

- Will suit the majority of applications
- Covers 25mm, 28mm, 30mm & 35mm Backsets
- 16mm faceplate (for use on UPVC & composite doors)
- 3 centre cases supplied (25mm faceplate reverses to make 28mm)
- Supplied with 2 locking point kits (hooks & rollers and mushroom and roller)
- Supplied complete with strikes

Overview

If you are looking for a UPVC repair kit that will be able to suit the majority of locks on the market then look no further. This kit contains 3 centre cases (with backsets 25mm, 30mm & 35mm with the 25mm faceplate being reversible which converts it to a 28mm), 2 locking point extension sets (2 x hooks & 2 x rollers and 2 x mushroom and 2 x rollers) and all strikes. The beauty of this kit is that all of the items are available individually so once you have used something you can top the kit up and be ready for the next job.

Operation

A - Lift lever to engage locking mechanisms and then one full turn of the cylinder to lock. One full turn of the key then push down on the lever to unlock

Product Code	Backset	Centres	Mfr Ref.	Spindle
CH10575	25, 28, 30 & 35mm	92mm	CH10575	Lift lever

CHAMELEON Adaptable Multi Point Lock 2 Hook & 2 Roller + Keeps

Features

- Supplied complete with keeps
- 16mm faceplate (for use on UPVC & composite doors)
- 2 x hooks and 2 x rollers
- Modular design makes them easy to transport
- Croppable locking point extensions make them suitable for many applications

Overview

The Chameleon repair lock has a 16mm faceplate and is supplied in 3 parts so is easy to transport. It is very easy to assemble and the locking point extensions can be cropped therefore making them suitable for use on differing heights of door. It is supplied complete with keeps and the split spindle versions can be used as single spindle locks if used with a solid spindle.

Operation

A - Lift lever to engage locking mechanisms and then one full turn of the cylinder to lock. One full turn of the key then push down on the lever to unlock.

Repair Lock - ERA

ERA 6135 / 9135 Lever Operated Latch & Dead - 2 Adjustable Rollers & Mushrooms (UPVC Door)

Features

- Designed to replace most multi-point locks in PVCu, Composite and Timber doors
- Modular 3 piece kit
- Croppable top and bottom extension pieces
- Non-handed lock mechanism with reversible latch bolt and snib facility as standard
- Split spindle for lever /pad applications
- Bi-directional throw of locking features - enhanced anti-jemmy feature

Overview

Designed to replace most multi point locks in the PVCu UK market, and fits conventional 16mm wide Euro groove, with 35mm backset. It uses conventional adjustable rollers for enhanced performance and weather sealing, and high tensile steel mushrooms for anti-separation with adjustable keep plates. Available with a Euro Cylinder or Vectis Plus gearbox.

Operation

A - Lift lever to engage locking mechanisms and then one full turn of the cylinder to lock. One full turn of the key then push down on the lever to unlock.

Features

- Tested to Police Approved Secured By Design standard and PAS24 door set capable
- Adjustable rollers create a weather-tight seal
- 3 hooks for High Security anti-separation
- Supplied with split spindles for nightlatch operation
- 10 year guarantee

Overview

Yale Doormaster® Professional is a High Security replacement lock designed to replace 100% of locks with top and bottom hooks or bolts, a 35m or 45mm backset, and a 16mm or 20mm faceplate. Designed with the professional installer in mind, this lock includes “crop & mate” technology to maximise the scope of installation.

Operation

A - Lift lever to engage locking mechanisms and then one full turn of the cylinder to lock. One full turn of the key then push down on the lever to unlock.

Notes

Designed for timber/composite doors, croppable when fitting for greater adjustment. The reach is measured between the handle spindle and the middle of the thrown Hookbolt (top or bottom).

AVANTIS Lever Operated Latch & Deadbolt Twin Spindle - 2 Hook

Features

- 2 Hook
- 16mm wide faceplate
- 92mm centres
- 35mm backset
- Twin spindle
- Latch & Deadbolt

Overview

Avantis door locks have the largest hook and bolts on the market at 25mm and are designed to provide both ultimate security & compression. This multipoint look has 2 hooks, a twin spindle, 35mm backset, 92mm centres and a 16mm wide faceplate.

Operation

A - Lift lever to engage locking mechanisms and then one full turn of the cylinder to lock. One full turn of the key then push down on the lever to unlock.

ERA 6635 Lever Operated Latch & Hook Bolt Split Spindle 16mm - 2 Hook 2 Roller

92 35

Features

- Bi-directional throw of locking feature - enhanced anti-jimmy feature
- Split Spindle for lever/pad applications
- Non-handed lock mechanism with reversible sash bolt
- 16mm Faceplate
- Snib facility as standard on all locks

Overview

Era's comprehensive range of multipoint locks are suitable for UPVC, composite, steel faced and timber entrance doors. This non-handed high security multipoint locking system is designed to meet the requirements of Secured by Design, passing the latest PAS23 and PAS24 testing criteria.

The Era 6635 has a snib, bi-directional throw of locking feature with an enhanced anti-jimmy feature and is suitable for split spindle lever/pad applications.

Operation

A - Lift lever to engage locking mechanisms and then one full turn of the cylinder to lock. One full turn of the key then push down on the lever to unlock.

L16393	45mm	95mm	Split	Latch & Deadbolt	9345 00 85AA	2

ERA Vectis Lever Operated Latch & Deadbolt Split Spindle 20mm Radius - 2 Hook

Features

- UK Vectis Profile Lock Case 5 Lever
- Hardened steel plates giving enhanced strength against attack
- No-Cylinder means the Vectis Plus is free from cylinder manipulation, breaking/snapping and plug extraction
- Snib Facility as standard on all locks
- Bi-directional throw of locking feature - enhanced anti-jimmy feature
- Split Spindle for lever/pad applications

Overview

ERA's Vectis Plus is the next generation of Cylinder free Multi-point Locking using traditional lever technology used in mortice locks

Operation

A - Lift lever to engage locking mechanisms and then one full turn of the cylinder to lock. One full turn of the key then push down on the lever to unlock.

FULLEX XL Lever Operated Latch & Hook Bolt - 2 Hook 2 Anti-Lift 2 Roller

92 35

fullex

Features

- Extendable top and bottom for maximum flexibility
- Roller cams for compression and smooth operation
- Can be used with either one piece or individual keep sets
- Secured by Design
- Three opposing steel hooks and two steel anti lift bolts
- Latch hold back snib on lock faceplate

Overview

The XL was designed from the outset to offer maximum security and reliability. Sharing many features from the highly successful SL16 Crimebeater lock, XL adds a centre hook, two steel anti-lift bolts and two roller cams for compression and smooth operation.

Every XL PVC lock is extendable top and bottom for maximum flexibility and combined with Fullex high security shootbolts, the XL French door system is fully capable of meeting PAS24 requirements. The XL Composite lock has 3 hooks, 2 anti-lift bolts and latch as standard. XL is available in a range of lock centres and can be used with either one piece or individual keep sets.

Operation

A - Lift lever to engage locking mechanisms and then one full turn of the cylinder to lock. One full turn of the key then push down on the lever to unlock.

- Latch hold back snib on lock faceplate

Overview

The XL was designed from the outset to offer maximum security and reliability. Sharing many features from the highly successful SL16 Crimebeater lock, XL adds a centre hook, two steel anti-lift bolts and two roller cams for compression and smooth operation.

Every XL PVC lock is extendable top and bottom for maximum flexibility and combined with Fullex high security shootbolts, the XL French door system is fully capable of meeting PAS24 requirements. The XL Composite lock has 3 hooks, 2 anti-lift bolts and latch as standard. XL is available in a range of lock centres and can be used with either one piece or individual keep sets.

Operation

A - Lift lever to engage locking mechanisms and then one full turn of the cylinder to lock. One full turn of the key then push down on the lever to unlock.

PRO Adaptable Door Handle

The chameleon® PRO Adaptable Door Handle can replace almost 100% of door handles using cleverly designed adaptable centres and backplate.

*See how adaptable
it is for yourself!
Scan Here*

Unique **Adaptable backplate** enables handle to accommodate a wide range of screw hole centres.

Adaptable handle height to accommodate both inline & offset lock centres between 59-96mm to allow for easy installation.

GRIDLOCK C Series Lever Operated Latch & Deadbolt Twin Spindle - 2 Deadbolt

Features

- Euro Profile Lock Case
- Latch & Deadbolt
- Twin Spindle
- 22mm "U" Rail Faceplate

Operation

A - Lift lever to engage locking mechanisms and then one full turn of the cylinder to lock. One full turn of the key then push down on the lever to unlock.

Notes

The original lock was the C Series but is now called the P Series. The C Series either had a loose Holiday lock or no lock. The P Series has a fixed holiday lock, this lock can be used for all styles.

WINKHAUS AV2 Auto Locking Lever Operated Latch & Deadbolt - 2 Hook

Features

- 16mm Faceplate
- Euro Profile Lock Case
- Latch & Deadbolt
- Can be fitted with electronic motor
- Ideal for UPVC & composite doors

Overview

The automatic locking AV2 2 hook multipoint lock has a 16mm faceplate and is ideal for use on UPVC & composite doors. The AV2 Autolock has the optional capability of becoming an electronic access controlled locking system. The lock is designed to accept a "screw on" 12v electronic motor which can then be controlled by means of industry standard multi option access control systems. When activated the two solid high tensile steel hooks and central latch are withdrawn thus forming the blueMatic AV2-E. The extreme versatility of the blueMatic AV2-E Electronic Locking system is achieved through its easy integration with all access control systems which subsequently leads to its suitability for many different applications.

Operation

Unit automatically locks when the door is closed, unlocks with key, inside handle or electrical input if optional motor is fitted.

WINKHAUS Cobra EFGA Latch, Deadbolt & 2 Hooks with Entryguard & Lockout Facility - 16mm

92 35 55

Features

- Entryguard integrated door opening restrictor
- Lockout facility
- Latch & Deadbolt
- 2 Hooks
- 16mm wide flat faceplate
- Secured by Design Approved

Overview

The Winkhaus lever operated EFGA 2 hook multipoint lock with Entryguard and a lock facility has a 16mm faceplate and is ideal for use on UPVC & composite doors. The automatically engaging Entryguard bar restricts the door opening and provides home owners a more secure option than the traditional door chain. Key holders are able to disengage the Entryguard bar from the outside.

In addition to this, the euro cylinder operated lockout box can be used to lock out the operation of the centre case. This is ideal for situations where additional security is required, such as leaving the property for an extended period of time.

With anti-push back hooks and a secure locking mechanism using sintered metal gears for increased lifespan, it's no wonder the Winkhaus Cobra range of multipoint locks is approved by the Police 'Secured by Design' initiative.

Operation

Lever operated - the deadbolt and hooks are thrown by lifting the door handle. The door is then locked using the key.

WINKHAUS Cobra Short Lever Operated Latch & Deadbolt Split Spindle & Lockout - 2 Hook

Features

- Euro lockout facility box locks out centre case operation
- 16mm Faceplate
- Euro Profile Lock Case
- Latch & Deadbolt
- Split Spindle

Operation

Lever operated latch & deadbolt multipoint lock system by Winkhaus which is fitted with a lockout facility box. The euro cylinder operated lockout box effectively locks out the operation of the centre case making it ideal for situations such as additional security if leaving a home for an extended period of time. It has 92mm centres, 16mm wide faceplate, a split spindle and 2 hooks.

Operation

A - Lift lever to engage locking mechanisms and then one full turn of the cylinder to lock. One full turn of the key then push down on the lever to unlock

YALE YS170 Lever Operated Euro Profile Slave Lock

Features

- Reversible
- PAS24 & Secured By Design Approved
- Euro cylinder profile
- 10 Year Guarantee
- 16mm faceplate
- Accepts standard 92mm unsprung handles

Overview

The Yale YS170 is a high quality multipoint locking system that has been designed with security and functionality in mind. This non-handed slave unit is suitable for use on the slave leaf of a French patio door and features a Euro profile centre case. Approved by the Secured By Design scheme and compliant with both the PAS24 and BS6375 standards, the YS170 is a lock that has been built to withstand the elements and comes with 10 year mechanical and security guarantee from Yale as standard.

Features

- PAS24 & Secured By Design Approved
- Ideal for UPVC doors
- Euro profile latch & hook bolt centre case
- Reverse hook bolts for anti-lift
- 10 Year Guarantee
- 16mm Stainless Steel faceplate

Overview

The Yale YS170 is a high quality multipoint locking system that has been designed with security and functionality in mind. This unit features a Euro profile latch & hook bolt centre case, a split spindle and 2 reverse action hook bolts (for superior anti-lift). For ease of use, the latch can be held or deadlocked by use of a snib. Approved by the Secured By Design scheme and compliant with both the PAS24 and BS6375 standards, the YS170 is a lock that has been built to withstand the elements and comes with 10 year mechanical and security guarantee from Yale as standard.

Operation

A - Lift lever to engage locking mechanisms and then one full turn of the cylinder to lock. One full turn of the key then push down on the lever to unlock.

YALE YS170 Lever Operated Latch & Hook Bolt Split Spindle - 2 Hook 4 Roller

Features

- PAS24 & Secured By Design Approved
- Ideal for UPVC doors
- Euro profile latch & hook bolt centre case
- Reverse hook bolts for anti-lift
- 10 Year Guarantee
- 16mm Stainless Steel faceplate

Overview

The Yale YS170 is a high quality multipoint locking system that has been designed with security and functionality in mind. This unit features a Euro profile latch & hook bolt centre case, a 16mm faceplate, a split spindle, 2 reverse action hook bolts (for superior anti-lift) and 4 rollers (for a tight, weatherproof seal). For ease of use, the latch can be held or deadlocked by use of a snib. Approved by the Secured By Design scheme and compliant with both the PAS24 and BS6375 standards, the YS170 is a lock that has been built to withstand the elements and comes with 10 year mechanical and security guarantee from Yale as standard.

Operation

A - Lift lever to engage locking mechanisms and then one full turn of the cylinder to lock. One full turn of the key then push down on the lever to unlock.

Join the revolution

The new Yale PAS3621 British Standard Doormaster is the ultimate solution for uPVC, timber and composite doors. The Yale BS Doormaster lock is currently the only multi-point lock that carries the British Standard Kitemark and offers a suitable retrofit replacement product for PAS24 doors without the need to fit an exact like for like replacement lock.

PAS 3621: 2011

The Yale Universal door handle features a unique and innovative design, with adjustable fixing points that cater for the majority of multipoint locks.

The Universal 12" Letterplate is designed to perfectly compliment the Yale PVCu door accessories.

The Platinum 3 Star cylinder has been independently tested by BSI to be awarded the British Kitemarked TS007:2014 3 Star accreditation.

TS007 3* Approved
for Maximum Security

Replacement Multipoint Lock, furniture and cylinders.

Overview

The Mila Supa range of superior grade stainless steel hardware offers exceptional strength and corrosion resistance. This lever/pad door handle with 92mm centres and a 240mm backplate is designed to fit most multi-point door locks fitted with a Euro-cylinder. Available in two stylish finishes, these handles are recommended for areas where corrosion is a concern, such as highly polluted or coastal areas. For added peace of mind, these handles come with a 25 year surface finish guarantee.

LIFT & LOCK UPVC Lever Door Furniture

Features

- No key required to lock the door from the inside simply lift the handle
- Non-handed - fits right and left handed doors.
- Sliding escutcheon accommodates 68-92mm centres and door thickness 45-72mm.
- Retro-fit armoured handle set for multi-point locks.
- Armoured escutcheon to shield cylinder.
- BS1906: 2002 Grade 4 Security and PAS 24 accredited.

Overview

Simply lifting the handle throws the multi-point bolts and deadlocks the door in a single keyless movement.

ASEC Kite Secure PAS24 2 Star 240mm
Lever/Pad Door Furniture 92 62 Centres

Features

- Anti-grip chamfered backplate shoulders provides mole-grip resistance
- M6 hardened Steel screws for extra strength
- Steel reinforcement technology concealed within the backplate
- Anti-drill rotating disc shields the front of the cylinder
- Anti-snap integrated cylinder guard
- 3 Star Rating if used in conjunction with the Kite Anti-snap cylinder

Overview

The Asec Kite Secure handle range combines visible security features with concealed reinforcement technology, providing ideal protection against cylinder and handle snapping. It is mounted on a 220mm high backplate, it has 92mm 62mm centres, 122mm screw centres and is suitable for a locking mechanism that takes a euro profile cylinder.

ERA UPVC Lever Door Furniture 3275

Features

- Manufactured from forged aluminium alloy or stainless steel for strength and resistance against attack
- The handle shields the cylinder behind the back plate giving only access to the key slot
- The unique profile of the backplate ensure the attacker cannot grip the handle backplate
- Fitted with high tensile M6 screw for added strength
- Can be used in conjunction with a '1 Star' cylinder to meet the '3 Star' specification
- Fits standard 92mm centres

Overview

The ERA High Security 'TS007 2 Star' Handle when used with a '1 Star' cylinder protects against snapping, bumping and other methods of manipulation to gain illegal entry. Manufactured from forged aluminium alloy or stainless steel for strength and resistance.

BORG LOCKS BL6100 Narrow Style Digital Lock With UPVC Extension

Features

- Suitable for internal or external applications
- Suitable for use with 90mm & 92mm centre multi point locks
- 70° handle rotation is ideal for multi-point locks
- 195mm fixing centres
- Narrow housing suitable for UPVC & aluminium applications
- 325mm extension plate
- Reversible Handing
- 1 Year Guarantee

Overview

The Borg BL6100 narrow style digital lock has been specially designed as a retro-fit solution for UPVC and aluminium doors. This non-handed digital lock with a single column 8 button keypad incorporates a 325mm extension plate fitted behind the keypad and inside handle to make it suitable for use with 90 & 92mm centred locks. The unique patented double button press design allows users to program a digit twice in the code. With a clutched keypad handle to protect against forced entry and lock damage, the handle of the BL6100 offers no resistance until the correct code is entered.

YALE Conexis L1 Smart Door Lock - No Module

Features

- Unique Twist & Go unlocking feature (turn your Bluetooth enabled smartphone 90 degrees to unlock door)
- Manage and program your lock using the Yale smartphone app
- Kit includes: 1 x Conexis L1 Smart Door Lock; 1 x Key Card; 1 x Key Tag; 4x AA Batteries; Fixing pack
- App enables you to monitor access as well as set new codes for friends and family
- PAS24 accredited
- Four entry methods (Yale App, Key Card, Key Tag and Phone Tag)

Overview

The innovative and easy to install Yale Conexis L1 Smart Door Lock can be managed entirely from your smartphone via the Yale App. Suitable for use with the majority of multipoint locks in the market and compatible with the Yale Smart Home system (Yale module available to special order) including existing Yale alarms and CCTV systems, the Conexis L1 gives users the flexibility to choose from four different keyless entry methods; app, key card, key tag or phone tag.

The unique Twist & Go feature allows users to quickly open the lock by simply turning their smartphone 90 degrees. The comprehensive App can be used to create & share access codes as well as monitor who has used the lock.

The secure push & turn thumbturn is engineered to give additional convenience and security to your door and, additionally, a 9V battery connection port can be used to power the Smart door lock in the event of flat batteries. This product also features a built in anti-tamper alarm, a 2 year guarantee, and connects to leading smart home systems when the appropriate module is fitted.

Greenteq Omega Letterbox

Features

- All metal frame construction
- Suits 40-80mm mid-rails and composite doors
- Supplied with M6 thru-fix screws or can be surface fixed
- Cushioned closing action
- Nylon brush seal to inside and weather seal to external flap
- 180° opening (both sides)

Overview

The Greenteq Omega Letterbox features a strong, cushioned closing action to stop rattling and internal brush seals and external Thermo-Plastic Rubber and Polyethylene seals to provide high quality draught and water protection.

Both the inner and outer flaps feature indentations on the lower frame to allow easy finger access and both open to a full 180° to avoid damage from rings or over-stressing the springs.

Cylinders - 1 Star

YALE Snap Resistant Euro Double Cylinder

Features

- 6 Pin Replacement Euro Profile cylinder
- BSI Kitemark Approved
- TS007 1 Star Cylinder
- Secured by Design Approved (to TS007 1 star)
- Maximum Security Level
- 10 Year Guarantee

Overview

The AS series offers British Kitemarked TS007:2012 1 star security and has been tested to the British Standard BS EN1303:2005. Developed with additional protective features to strengthen the cylinder, make it harder to grip and protect against cylinder snapping.

Suitable as a replacement product on UPVC, wood and composite doors, this cylinder is Secured by Design approved and recommended for use on doors that require a high level of security against physical and manipulation attacks.

EVVA EPS L111 & S363 Cylinders To Suit Banham Locks

Features

- Patented & registered system
- Wear & drill resistant
- For EI30 and E30 fire and smoke doors approved to EN 1634-1
- Complies with lock security grade 6 as specified in EN 1303:2005 (highest grade)
- Complies with attack resistance grade 2 as specified in EN 1303:2005 (highest grade)
- When a key is inserted on one side, the door may not be locked from the other side with another key

Overview

The EPS mechanical locking system (Extended Profile System) is a very economical solution for a cylinder system offering convenience, manageability and a high level of security. The system contains a wide variety of locking elements covering virtually any application and offers legal and technical key protection mechanisms to ensure a high degree of protection against key copying.

WINKHAUS AV2 Auto Locking Lever Operated Latch & Deadbolt - 2 Hook

Features

- 16mm Faceplate
- Euro Profile Lock Case
- Latch & Deadbolt
- Can be fitted with electronic motor
- Ideal for UPVC & composite doors

Overview

The automatic locking AV2 2 hook multipoint lock has a 16mm faceplate and is ideal for use on UPVC & composite doors. The AV2 Autolock has the optional capability of becoming an electronic access controlled locking system. The lock is designed to accept a "screw on" 12v electronic motor which can then be controlled by means of industry standard multi option access control systems. When activated the two solid high tensile steel hooks and central latch are withdrawn thus forming the blueMatic AV2-E. The extreme versatility of the blueMatic AV2-E Electronic Locking system is achieved through its easy integration with all access control systems which subsequently leads to its suitability for many different applications.

Operation

Unit automatically locks when the door is closed, unlocks with key, inside handle or electrical input if optional motor is fitted.

BORG LOCKS BL6100 Narrow Style Digital Lock With UPVC Extension

Features

- Suitable for internal or external applications
- Suitable for use with 90mm & 92mm centre multi point locks
- 70° handle rotation is ideal for multi-point locks
- 195mm fixing centres
- Narrow housing suitable for UPVC & aluminium applications
- 325mm extension plate
- Reversible Handing
- 1 Year Guarantee

Overview

The Borg BL6100 narrow style digital lock has been specially designed as a retro-fit solution for UPVC and aluminium doors. This non-handed digital lock with a single column 8 button keypad incorporates a 325mm extension plate fitted behind the keypad and inside handle to make it suitable for use with 90 & 92mm centred locks. The unique patented double button press design allows users to program a digit twice in the code. With a clutched keypad handle to protect against forced entry and lock damage, the handle of the BL6100 offers no resistance until the correct code is entered.

YALE Conexis L1 Smart Door Lock - No Module

Features

- Unique Twist & Go unlocking feature (turn your Bluetooth enabled smartphone 90 degrees to unlock door)
- Manage and program your lock using the Yale smartphone app
- Kit includes: 1 x Conexis L1 Smart Door Lock; 1 x Key Card; 1 x Key Tag; 4x AA Batteries; Fixing pack
- App enables you to monitor access as well as set new codes for friends and family
- PAS24 accredited
- Four entry methods (Yale App, Key Card, Key Tag and Phone Tag)

Overview

The innovative and easy to install Yale Conexis L1 Smart Door Lock can be managed entirely from your smartphone via the Yale App. Suitable for use with the majority of multipoint locks in the market and compatible with the Yale Smart Home system (Yale module available to special order) including existing Yale alarms and CCTV systems, the Conexis L1 gives users the flexibility to choose from four different keyless entry methods; app, key card, key tag or phone tag.

The unique Twist & Go feature allows users to quickly open the lock by simply turning their smartphone 90 degrees. The comprehensive App can be used to create & share access codes as well as monitor who has used the lock.

The secure push & turn thumbturn is engineered to give additional convenience and security to your door and, additionally, a 9V battery connection port can be used to power the Smart door lock in the event of flat batteries. This product also features a built in anti-tamper alarm, a 2 year guarantee, and connects to leading smart home systems when the appropriate module is fitted.

WINKHAUS AV2 BlueMatic Motor Unit

Features

- Retro fits to Winkhaus AV2 Multipoint Lock
- Easy to install
- Can be linked to an intercom system, remote control, etc.
- Can be used on UPVC, wooden, aluminium or composite doors

Overview

The AV2 Autolock has the optional capability of becoming an electronic access controlled locking system. The lock is designed to accept a "screw on" 12v electronic motor which can then be controlled by means of industry standard access control systems. When activated the two solid high tensile steel hooks and central latch are withdrawn thus forming the blueMatic AV2-E. The extreme versatility of the blueMatic AV2-E Electronic Locking system is achieved through its easy integration with all access control systems which subsequently leads to its suitability for many different applications.

CHAMELEON Fully Adaptable Espag Rod - 13mm Faceplate

Features

- Mechanism is 1 metre long and 13mm wide
- Can be cropped on either side in 10cm increments
- Centre case can slide 20mm & rotates the follower 45°
- Screw fixings have inserts which act as pivot points
- 4 mushroom locking points
- Threaded holes in centre case

Overview

This espag rod is extremely adaptable, it is supplied as a 13mm wide inline 1 metre strip with 4 mushrooms however each side can be cropped up to 4 times in 10cm increments. The centre case has an 8mm follower and 2 threaded holes and slides 20mm to the side which rotates the follower from square to diamond. The screw holes have plastic inserts which not only allow for tolerances when installing but act as pivot points to allow the locking mechanism to operate.

KENRICK Excalibur Window Gearbox - Shootbolt

KENRICK

Features

- No top cover plate and is very quick to fit
- The complete Excalibur Dual Claw Locking Shootbolt complies BS7950, Secured By Design and BBA approvals
- Secured by Design Approved

Overview

This is the centre case to suit the Excalibur dual claw shootbolt. It is one of the most effective ways of securing PVCu, Timber or Aluminium casement windows.

Excalibur's centre claws lock securely into a very substantial centre keep, whilst two steel shootbolts lock into the corners of the window offering excellent resistance against attack.

CHAMELEON Friction Stay 4mm Packers

Features

- Converts 13mm step height to 17mm
- Supplied in packs of 20
- For use with all Chameleon friction stays
- Easy to fit

Overview

This 4mm packer is easy to install and is used to convert a Chameleon friction hinge with a step height of 13mm into a friction hinge with a step height of 17mm. With this small packer you can now just hold the one friction hinge in stock but be able to provide both step heights.

Overview

The Hoppe Tokyo Inline is an espagnolette handle made from cast aluminium and designed for minimal aesthetic intrusion with concealed fixing screws. A push cylinder, which can be deadlocked by using a key, operates the handle. The Hoppe Tokyo Inline has a positive stop at 90°, is non-handed and the handle latches automatically when closed.

YALE YWHLCK40 Espag Offset Window Handle

Features

- Replacement window handle for PVCu windows
- Supplied with fixing screw, screw cover cap and key
- Spindle markings make it easier to cut down if a shorter length is required
- Offset provides more hand space when opening
- 40mm Long Spindle
- 2 Year Guarantee

Overview

The Yale YWHLCK40 is a replacement window handle for PVCu windows. This particular product is offset and fits most sizes of popular PVCu windows thanks to its 40mm spindle. Spindle markings on the product make it easier to cut it down when a shorter length is required.

WINKHAUS Window Safety Catch Restrictor OBV

Features

- OBV Safety Catch
- Prevents window from slamming shut
- Optimum child security.
- The OBV locking bar can be released for full opening of the sash by keeping the push button depressed
- Restricts the opening distance in the turn position to 50mm if mounted on the lock side, when mounted horizontally variable opening distances can be achieved

Overview

The Winkhaus OBV Safety Catch is one of the family of Window restrictors which are designed to help prevent children opening windows fully and falling out, and windows from slamming shut. The OBV locking bar can be released for full opening of the sash by keeping the push button depressed.. The safety catch automatically restricts window opening regardless of the sequence of Overview, and locks automatically. When the window is closed from the turn position, the limit opening function re-engages. This product is maintenance friendly as the frame section is adjustable within a range of 3mm.

GLAZPART 236mm Trickle Vent

Features

- Superior air flow with reduced vent size
- Can be used on PVCu, aluminium and timber windows
- Meets the requirements of Building Regulations Approved Document F1
- External canopy and internal opening flap
- Reduces draughts by directing air away from occupants without reducing the air flow
- Versatile inner flap allows air to be directed up or downwards

Overview

Available in 7 colour options, the GLAZPART 236MM Trickle Vent is a compact and stylish ventilation solution. Featuring rounded ends which allow the vent to be rebated into timber frames, and inner flap allowing air to be directed either up or downwards, this screw-in product is suitable for PVCu, timber and aluminium window frames.

CAL LOCKS Doublex Patio Sliding Door Lock

Features

- Double pin to prevent the door from being lifted or forced open.
- Ideal for additional security or as replacement lock.

Overview

The CAL double-bolt lock works by securing the door to the frame at two security points and preventing any movement of the door. With its double locking action, the CAL double-bolt lock makes it virtually impossible to remove the door by lifting off its track.

The CAL double-bolt lock can be used as a secondary or primary locking system on glass sliding doors. The lock can be mounted above the OEM lock to be out of children's reach or below the OEM lock to be within children's reach. The lock can also replace the OEM lock with the addition of the OEM replacement cavity. A CAL door handle is also an optional accessory and is available as an add on to the double bolt lock. The handle can be bolted on top of the double bolt lock for easier Overview of the glass sliding door. .

CAL LOCKS UPVC Door Lock

Features

- Double pin to prevent the door from being lifted or forced open.
- Ideal for additional security.

Overview

The CAL Single Lock is a powerful anti-theft device for all types of non-sliding doors and windows, single or double sided. It can be fitted onto UPVC, Timber or Aluminium doors, and can also be used on window shades and shutters. The CAL Single Lock can also be used as a child safety measure, as it can be positioned above the existing locking mechanism, out of the reach of children.

CAL LOCKS Patio Handle

Features

- Designed to fit onto the L18711.
- Can be used as a repair handle on its own.

Overview

The CAL door handle easily attaches to the CAL Double Bolt Lock, to enable it to be used as a handle as well as a highly secure lock.

The CAL lock works by securing the door to the frame at two security points and preventing any movement of the door. With its double locking action, the CAL lock makes it virtually impossible to remove the door by lifting off its track.

BOND IT Decorators Caulk EU3

Features

- Quick drying interior decorators filler that can be smoothed and over-painted within 1-2 hours of application.
- Adheres to most surfaces and being flexible will allow low movement in joints between different materials or substrates.
- For sealing and filling gaps and cracks in skirting boards, ceilings, stair risings, interior wooden door and window frames, fitted furniture and light fittings.
- For filling interior cracks and damage in plaster, brick, concrete and plasterboard.
- Can be over-painted with emulsion paint as soon as a skin forms after approximately 1 hour, for oil based paints allow to dry completely for 24-48 hours before over-painting.
- Not recommended for external use, for UPVC or in wet areas.

Safety or Profits?
You deserve both!
So use Sashmate®
window repair tools

sashmate®

The industry recommended Patent Granted Sashmate® window repair tools have been designed to allow a single operator to carry out externally glazed glass unit, Espagnolette and friction stay repairs to uPVC, aluminium and wooden windows safely from the inside of the building without the need for ladders, scaffold or a second operator. The Sashmate tools can be setup in seconds allowing jobs to be carried out in literally minutes.

Sashmate® Top Hung

Setup in seconds the Sashmate® Top Hung will make any repair simple. Use on small top vents to large top hung sashes above, below and between transom bars.

Sashmate® Side Hung

The Sashmate® Side Hung uses the same basic concepts as the Sashmate Top Hung and has been modified to make it suitable for side hung windows. Using the Sashmate® Side Hung is simple and efficient and enables a sash to be removed and re-fitted in less than two minutes.

Sashmate® Top Hung Rolling Bar

Our new Top Hung Rolling Bar has been developed to further assist an operator to safely repair a top hung window sash. The new Rolling Bar system stabilises the two independent Sashmate Top Hung tools whilst creating a rolling platform, allowing the operator to safely slide the sash in and out of the building instead of carrying it.

Sashmate® Top Hung Drop Set

If a friction stay or both stays have twisted and broken forcing the sash to drop lower than normal the Top Hung Drop Set is the perfect solution. This accessory is fitted to the Sashmate® Top Hung allowing the horizontal arm to drop a further 100mm underneath the sash.

Sashmate®
takes the
weight, so you
don't have to!

Sashmate® Top Hung Telescopic Rods

The NEW Sashmate® Top Hung Telescopic Rods are used instead of the standard solid main rods, allowing the Sashmate® Top Hung into short complete openers of approximately 650>1220mm in height.

Visit **www.sashmate.com** where you can take a look at the tips & tricks pages and watch the demonstration and time trial films.
