

ASEC Euro / Oval Nightlatch Case

Description

This Asec dual profile mortice nightlatch case has an oval cut out and wrap around plate with a euro cut out held in place with 3 machine screws, it takes a euro cylinder out of the box however to change it to take an oval cylinder simply remove the 3 screws and slide the plate off.

It has an integral knurled wheel roller to hold the latch in the retracted position for passage mode, has a field reversible latch bolt and is fitted with an antithrust device making it ideal for access control applications.

The versatile dual profile cylinder mortice nightlatch comes complete with a box strike, faceplate, fitting instructions (including a scale fitting template) and all fixings.
