

## ASEC Open Shackle Padlock Without Cylinder

### Description

---

The Asec body only padlock is designed to accept a standard 40mm (30/10) half euro cylinder fitted with an adjustable cam with no cutting required. Ideal for use in master key systems for securing property such as bins and garages. The 26.5mm thick chrome plated brass body and 10mm diameter stainless steel shackle make this padlock highly resistant against bolt cutter attacks.

Operated By Euro Cylinder

Weather Resistant
