

ASEC Security Cable With Hoops

Description

When used with a U-lock, disc lock or padlock the range of Asec double-looped steel cables with PVC casing can be used to secure large or irregular shaped objects such as bicycles or ride-on lawn mowers. The braided steel cable has greater core density than twisted cable which increases the products resistance to cut attacks.

Features

- Available in pre cut lengths from 1m to 9.1m in length
- Suitable for use with U-locks, disc locks and padlocks
- Range of Asec security cables with hoop ends
