

Spread A Door

SPREAD A DOOR UPVC Door Spreader Tool

Description

The Spread A Door tool can be used to spread a UPVC door away from the frame, exposing the multi point locking system therefore making it an ideal tool for repair work where multi point mechanism failure is the cause.

The Spread A Door tool leaves no marks when used correctly and can also be used on UPVC windows. It is made from 4mm steel, has a detachable rubber grip handle and a leading chamfered edge for easy insertion.

Features

- Longer tool provides extra leverage on tough doors
- Short tool ideal for working each locking point back
- Powder coated black
- Leaves no marks with correct use
- Rubber grip handle
- Insert between frame and door to expose multi-point locking system
