

OEM 5 Button ID46 Hands Free Proxy Remote Key (No Logo) To Suit Range Rover

Description

5 Button Proxy-Hands Free Remote with ID46 Transponder Chip. The emergency key blade to suit this remote can be purchased separately (L26121).

Please Note

We are aware of an issue when trying to program these Range Rover Remotes into some vehicles 2013 onwards. We believe this is due to certain vehicles which have had the software updated by the dealer. In some cases the new remote will not program in and the vehicle also clears the original from the memory. Aldridge Security cannot accept responsibility if this happens and will not be able to issue refunds or compensation.
