

ASEC Closed Shackle Padlock Without Cylinder

Description

The Asec body only padlock is designed to accept a standard 40mm (30/10) half euro cylinder with no cutting required. Ideal for use in master key systems for securing property such as bins and garages. The 26.5mm thick chrome plated brass body, stainless steel closed shackle and 10mm shackle diameter make this padlock highly resistant against bolt cutter attacks.

Operated By Euro Cylinder

Weather Resistant
