

Description

This IR 2.4 GHz plug & play outdoor camera is an optional accessory for the 7" LCD plug & play monitor. You have the option to operate up to four cameras of this type with the monitor.

The 2.4 GHz IR plug & play outdoor camera has integrated IR LEDs for 24/7 use both day and night. With the camera, you transmit the video signals wirelessly to the plug & play monitor.

Wireless signal transmission is an advantage anywhere cables are impossible or difficult to lay. The conversion into digitally encrypted signals allows malfunctions, interference, and any potential viewing of images by third parties to be reliably prevented.

IP66

IP66 Ingress Protection Rating
