

ABUS PPDF16000 OneLook Wireless IR Outdoor 7 Inch Touchscreen Surveillance Set

Description

The complete set contains everything you need to put the product into operation: a wireless outdoor camera for 24/7 operation and a 7" wireless full colour monitor with an intuitive touchscreen for easy operation. Ideal for private homes, restaurants, offices, and small businesses. It is also easy to monitor a vacant vacation home using remote access.

Large monitor, seamless images, easy operation -

The clear monitor image serves as a surveillance center. This allows you to keep an eye on everything. You operate the device with a user-friendly recorder menu on a touchscreen. This makes operation of the video set easy and fast. Recordings are made to an SD card in the monitor.

Docking station: Remote access using the smart phone app - Thanks to remote access, you always see what is going on – even when you are on the go. To do this, you only need to download the ABUS app and "park" the monitor in the docking station (which simultaneously charges the battery). As soon as the Internet connection is established, you can use the app to view live images of all cameras.

Wireless digital encryption - The image and sound are transmitted between the camera and monitor on a secure basis. This excludes the possibility of third parties viewing the images or listening in.

Expandable to up to four wireless cameras - The complete set includes the monitor and one wireless camera. The monitor can be connected with up to four cameras, so you can add up to three additional cameras.

IP66 Ingress Protection Rating
