

ASEC Single Run Sliding Door Gear

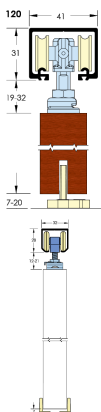

Description

The Asec Single Run sliding door system is designed for lightweight single internal sliding panel doors and has a top hung design constructed from aluminium, ideal for room dividing partitions. It features a clip on hanger plate which makes light work of installation and adjustment as well as 4 wheels with nylon tyres and ball race for smooth and quiet motion.

Features

- Various opening widths available
- Precision sealed bearings for durability and noise reduction
- Easy height adjustment with spanner (supplied)
- Quick snap connection with slide feed
