ASEC Safety Lockout Tagout Padlock with Wire Shackle

Description

This Asec Safety Lockout Tagout Padlock features a flexible 3mm wire shackle, making it a versatile padlock for various applications, particularly for use with smaller MCB lockouts or for when a standard padlock is unsuitable. It's designed specifically for lock out / tag out (LOTO) applications and it is non-conductive, non-sparking, and resistant to chemicals and corrosion.

Supplied With 1 Key	6 Pin Mechanism	Key Retaining

Features

- Ribbed body for easy handling
- Non-conductive, non-sparking and resistant to chemicals and corrosion
- Colour coded for easy identification with a photo-luminescent label
- Key retaining - can't be unlocked by accident
- Designed specifically for Lockout / Tagout applications
