

Description

The Abloy EL560 electric lock is a 65mm backset high security lock with a deadbolt and anti-friction bolt which deadlocks when the door closes. Its trigger bolt is easily reversible, and suitable for all hands of door. This product is tested to mechanical resistance EN12209, and meets EN179 for emergency exit doors & EN1634-1 for fire resistance (when used with the correct exit hardware). The EL560 is outside handle controlled, fail locked/fail unlocked, and particularly suitable for wooden or metal doors (interior doors of business premises, public buildings, hospitals and schools, medium traffic exit doors & medium traffic fire rated doors).

65mm Backset

Key Override Facility

Electronically
Monitored
