

# AUTOPA Retractablepost GL Cylinder Lockable Retractable Parking Post

## Description

---

The RetractaPost is a simple, cost efficient but highly effective and convenient way to prevent unwanted vehicle access and deter ram raids. The padlock is positioned at the base of the post, between the post and cover flap for added protection.

The post is operated by lifting fully out of the ground and then rotating 45 degrees. Once in the extended position the post can be locked in place using the integral cylinder lock.

Heavy Item (may incur delivery costs)

Weather Resistant

## Features

---

- 3mm wall thickness
- Socket flap closes flush with the ground thereby leaving no projections or uncovered holes once the post is removed
- Loop for optional chain
- High visibility red & white striped design
- Weatherproof galvanised finish
- Locked using an integral cylinder lock
