

## AUTOPA Retractable Post Padlocked Retractable Parking Post

### Description

---

The RetractaPost is a simple, cost efficient but highly effective and convenient way to prevent unwanted vehicle access and deter ram raids. The padlock is positioned at the base of the post, between the post and cover flap for added protection.

The post is operated by lifting fully out of the ground and then rotating 45 degrees. The lug at the rear of the post aligns with the flap to allow the padlock to lock the post to the flap.

Heavy Item (may incur delivery costs)

Weather Resistant

### Features

---

- 3mm wall thickness
- Socket flap closes flush with the ground thereby leaving no projections or uncovered holes once the post is removed
- Loop for optional chain
- High visibility red & white striped design
- Weatherproof galvanised finish
- Locked using a padlock (not included)
