

Description

This sashlifter is fitted to the door to counter the effect of door drop. When the door is closed the sashlifter lifts the door so that when it closes it marries up the locking points with their respective keeps for smooth and reliable operation.

Features

- Solid metal construction
- Easy to fit
- Spring loaded
- Aligns locking points with keeps
- Lifts sagging UPVC doors
- If using with L17414 the standard keeps are not suitable - please contact the specials department who will advise on the correct keep to be used in this situation
