

BORG LOCKS BL2401ECP Easicode Digital Lock With Optional Holdback

Description

The Borg BL2401 Easicode Digital Lock comes standard with a 60mm latch and an optional holdback which can be removed if not required. This non-handed medium duty digital lock is suitable for use on doors with a thickness of up to 54mm where frequent code changes are required. Reset the code in a matter of seconds with the new Easicode changing method which requires no tumblers to be removed.
