

Description

TITALIUM™ locks by Abus represent a new dimension in security and represent a high level of security whilst weighing significantly less (30%) than comparable locks. This is all thanks to the innovative material of which the locks are made, namely a special aluminium alloy that uniquely combines a high level of torsion with lightness. The TITALIUM™ locks have a modern stainless steel finish, and offer maximum strength combined with a low weight.

Operated By Euro
Cylinder

Key Retaining

Weather Resistant
