

ABUS Titalium 86TIIB Long Nano Shackle Euro Padlock

Description

TITALIUM™ locks by Abus represent a new dimension in security and represent a high level of security whilst weighing significantly less (30%) than comparable locks. This is all thanks to the innovative material of which the locks are made, namely a special aluminium alloy that uniquely combines a high level of torsion with lightness.

The special alloy steel shackle has a NANO PROTECT coating which also offers extra corrosion protection. These TITALIUM™ locks have a brushed satin finish and offer maximum strength combined with a low weight.

Operated By Euro
Cylinder

Key Retaining

Weather Resistant

Features

- Double bolted
