

Description

Van door lock by Bulldog, designed to suit the rear doors and off side sliding doors of vehicles, creating an extra level of security beyond factory fitted vehicle locks. The highly visible yellow powder coated finish acts as a deterrent to would-be thieves, and the drill and pick resistant lock with hardened steel case makes this product reassuringly robust. It is both easy to fit and easy to use, as it is supplied complete with all required fixings, has no loose parts, and it can be locked without the use of a key, only requiring the key when the lock needs to be opened.

Supplied With 2 Keys
