

Description

Combine our two different van door locks by Bulldog to create an impenetrable level of van security. With the VA101 for rear and off-side sliding doors, and the VA102 for near-side sliding doors, this kit provides dual security measures. Both locks have a highly visible yellow powder coated finish, which acts as a deterrent to would-be thieves, and the drill and pick resistant lock with hardened steel case makes this product reassuringly robust. They are both easy to fit and easy to use as they are supplied complete with all required fixings, have no loose parts, and can be locked without the use of a key, only requiring the key when the locks need to be opened.

Supplied With 3
Keys

5 Year Guarantee

UK Manufactured
