

Description

The KeyCage is the carbon key organizer that is more compact and stylish than a bunch of keys. It comes in a double asymmetric design which means you can find your most important keys without looking. When you grab your KeyCage you will find the key you want straight away, great in the dark and when carrying other things.

The force to swing out the keys is individually adjustable by the torque of the bolts and the KeyCage can be assembled with 1 – 14 keys, included in the kit are the following:-

- 16 x stainless steel bolts (8mm, 10mm, 12mm, 14mm, 16mm, 18mm, 20mm & 22 mm)
- A carbon loop is included, ideal for fixing things like your car key; this can be inserted in the KeyCage instead of a key
- 3 x 1.5 mm stainless steel spacers to balance height difference
- 10 x 0.5 mm Teflon spacers to minimize friction between the keys
- Allen key for mounting

Features

- 3 x 1.5 mm stainless steel spacers are included to balance the height difference
- 10 x 0.5 mm Teflon spacers are included to minimize friction between keys
- A carbon loop is included
- The force to swing out the keys is individually adjustable
