

Description

This Fingersafe Home fingershield guard is designed to prevent finger trapping and crushing in the hinge area door. This particular model is intended for domestic use on the front face of a door and is 2030mm long (designed to fit standard UK door heights). It is particularly easy to install, remove and refit, with no glue or nails required and it also acts as a secondary smoke inhibitor and draft excluder with the added bonus of being easy to clean.

2 Year Guarantee
