

CHAMELEON Replacement Window Espag Handle Non-Locking Button

Description

This button allows you to swap out the key operated lock on the range of Chameleon adjustable espag handles. Once successfully installed, this button provides a permanent means of unlocking and operating the handle, ideal for egress applications.

Features

- Supplied as button only (espag handles supplied separately)
- Non locking, always allows exit if installed correctly
- To suit the Chameleon range of adjustable espag handles
- Used to convert standard espag handles to egress handles
