

Description

The Nanocoast Plate Mounted Lever Handle Furniture from Fullex features a euro profile cut out and is designed to be used on front doors in conjunction with the Fullex Gemini, SL16 and Type A Case Locks. They are corrosion resistant, having been salt spray tested for 2,000 hours, and they come with a lifetime coating guarantee from the manufacturer. Made from grade 316 stainless steel, this high quality lever handle has a tubular shape, providing a comfortable grip. The levers have been tested for up to 1 hour fire resistance and they are available in a variety of finishes to match other door furniture, making these a hard wearing and versatile choice of lever.
