CODELOCKS CL100 Series Surface Deadbolt Digital Lock

Description

This entry level mechanical push button lock provides a comprehensive range of functions for light duty entry control, for inner office doors, storage rooms or cupboards in commercial premises, sheds, garage-to-house doors or cupboards at home.

CL100 series locks offer excellent value for money. Delivered with random, unrecorded codes, simply change the code by following the clear instructions provided. Installation couldn't be simpler either - just drill one hole for the spindle, two holes for the fixing bolts and one extra if a mortice latch is required.

This version is supplied with a surface deadbolt which slides on the inside of the door to lock/unlock. The bolt is moved manually by the outside knob after correct code entry, and moved freely by the inside knob at all times.

Clean by Codelocks is an optional finish available to special order on many Codelock products. The clear coating combats SARS-CoV-2 coronavirus (COVID-19) and can reduce bacterial growth by 99.96%*, providing an additional measure of protection over sanitisation. Clean by Codelocks features an ISO certified photocatalytic coating which offers enhanced protection against viruses, bacteria, germs and other environmental toxins. For full details please view the data sheet in the associated documents or to order please contact our Specials Department.
