

ULTIMATE Powerdrive Max Flexi Drive

Description

The UltiMATE Powerdrive Max Flexi Drive is an entry method tool for gaining access using 'WOTIWO' POWERdrive technology (working on the inside whilst on the outside). This tool allows users to gain entry in a fast and professional manner, with an emphasis on damage limitation as well as the ability to turn or manipulate any object 360°. It is used in conjunction with the entry level letterbox kit/s and a wireless endoscope view transmits clear images to any smartphone.

The PowerDrive MAX is supplied with the UltiMATE MultiGrip Tool Head and it's sister tool head The Crib. These two versatile tool heads have industry-leading adaptable capabilities using many different modular functionality options & configurations. This tool allows trained technicians quick access to doors which have been secured with deadlocks, security chains, bolts & other locks and it is ideal for situations where property owners have mislaid their keys or if the property requires access in an emergency or covert scenarios such as by the Fire Brigade or Police, leaving most locks & security applications undamaged with no sign of forced entry.
