

SILCA Air4 V 64 Remote

Description

The Air4 remotes from Silca are designed for easy duplication of the majority of popular remotes on the market. This Air4 V 64 version replaces Air4 V Remotes and is intended for fixed & rolling code remotes that have a frequency ranging from 433.92 MHz to 868.35 MHz (AM/FM). The remotes are available in a choice of finishes, or in a multipack for convenience when more than one remote will be required per customer.

These remotes offer versatility and convenience, as customers can duplicate up to 4 different remotes using just one device. The LED is Orange/Red. The Air4 system is so convenient that, when used with the Silca Easy Scan Plus software, remotes can be duplicated even in the absence of the original, giving the user everything required to set up a comprehensive remotes service.

4 Buttons

Weather Resistant
