

Description

Designed for use with UPVC and Timber vertical sliding windows and available in a range of finishes, the ERA Sash Restrictor is a convenient solution for limiting the opening on sliding sash windows. They are ideal for use in areas where children or vulnerable adults may be at risk of finger trapping or falling from windows, and for maximum security it is recommended to install a restrictor on both sides of the sash. Routed into the sash, the restrictor sits discreetly on the window and uses a key lockable spring loaded bolt. It is available as either side-fixing and front-fixing and they are all non-handed for easy installation.

Supplied With 1
Key

10 Year Guarantee
