

ADVANCED DIAGNOSTICS Smart Pro OBD Key Programming Machine

Description

The Smart Pro is a state-of-the-art, User-friendly OBD vehicle key programmer from the World Leaders Advanced Diagnostics.

As you can see in the video, the easy to use software interface guides you through the entire process from start to finish so whether you are completely new to Key Programming or an advanced user this is the ideal machine to have!

The Onboard-Software is driven by Info Quest, the Advanced Diagnostics online key programming database with information for over 5000 vehicles, covering most makes and model worldwide. This means all the information needed to program a key is collected in one place, always updated and immediately available.

The Smart Pro comes with 3-Months UTP (Unlimited Token Plan) meaning you can use the machine for 90 days from purchasing without having to buy any tokens. After the 3-months the Smart Pro has a unique all-in-one hybrid solution which means you can Pay-As-You-Go, use Unlimited Token Plan and/or purchase software making this the most cost-effective tester on the market. Further functions include ECU identification, EOBD read and clear fault codes (manufacturer dependent), and archive of previously programmed vehicles.

The powerful quad core processor, new hardware and software architecture are designed to save you time. By integrating key programming and PIN reading functions for most makes into one step, the programming process is significantly faster. Smart Pro can be updated via Wi-Fi with step-by-step guided procedures or via PC using the USB cable supplied. When updates are available a notification will appear, while a tick in the status column identifies the modules requiring an update.

The My Smart Pro section helps keep an eye on token credits, currently active UTP plans, expiry dates, and purchased software modules. Customised data archives and favourites grant easy access to the most frequently used programming procedures. Smart Pro incorporates transponder identification, presetting and precoding functions for a more streamlined process; just connect Smart Aerial to the device and follow the instructions.

Cutting edge technology and expansion ports mean the Smart Pro is futureproofed, giving you a tester that will last many years to come. The Smart Pro screen is made from gorilla glass, a resistant and long lasting material, and the device is fully portable and easy to carry, supplied in a hard body carry case with internal rubber shaped slots for holding all the tools necessary to program keys and remotes

The following transponder types are supported: Texas®, Texas® Crypto, Texas® 80 bit, Philips® Crypto, Philips® Crypto 2 and Megamos® Crypto.

EXISTING AD OWNERS- You can transfer all your Software Modules, Tokens or UTP from your existing machines over to the new Smart Pro.

Included with the machine are the following Free Software Modules:

- ADS100 Ford® Europe/USA
- ADS102 General Motors
- ADS105 Peugeot/Citroën
- ADS109 Suzuki
- ADS110 Honda/Acura
- ADS112 Nissan
- ADS115 VAG
- ADS117 Mitsubishi
- ADS118 Hyundai®/Kia
- ADS125 Toyota®/Lexus

Kit contents:

- Smart Pro device (AD2000)
- Mains cable (ADC2009)
- OBD cable (ADC2000)
- AC/DC power supply unit (ADC2006)
- USB cable (ADC2004)
- 50 way to 25 way converter (ADC2001)
- Pin saver (ADC2002)
- USB flash drive operating manual
- Printed quick start guide

Finance Available

Features

- 10.1" (256.5mm) full colour (LCD 1280 x 800) PCAP touch panel
- Icon driven user interface with easy to use vehicle menu search
- Info Quest vehicle database built-in
- Free 3 months unlimited use
- Program transponder keys, proximity and remote keyless entry
- All-in-one hybrid solution means you can Pay-As-You-Go, Use Unlimited Token Plan and/or Purchase Software
