

ERA WiFi HD IP116 PLUS Camera

Description

The Era Wireless IP Camera IP116 PLUS allows for remote monitoring of internal CCTV wherever you are, using the free Smartphone app. This camera is completely wireless and compatible with existing ERA Wireless Alarm systems, meaning that when any alarm sensor is triggered, the user is able to check activity from their mobile phone. The app can also be set to allow additional users, such as family members, authorisation to access the device. The IP116 Plus is a 2nd Gen model, with additional features added to improve on the original. It has a Micro SD card slot that supports up to 32GB, that records in a loop (Micro SD card optional & not included). Additional new features include motion detection and privacy mode.

The `two way talk` feature means that audio can be transmitted back and forth between the user and the monitored space. The HD 720p video is available in colour or black & white with Night Vision and, with an extra wide 5mp angle and the ability to turn 360°, it is one of the most comprehensive IP cameras available. The camera has a super wide angle with crystal clear video, and it is supplied complete with an adapter, reset pin, instruction manual and fixing kit.
