

MASTER PICK 2 Way Vehicle Tension Tweezer Tool

Description

This double sided tension tweezer tool from Master Pick is a handy piece of piece of kit to have when working with vehicle locks. Also known as a tension wrench, it holds the lock open whilst simultaneously providing tension, making them ideal for the non destructive opening of most wafer locks used in cars and other vehicles.

The tip of the jaw has 2 differently sized notches to be used with different types of cylinder and the tool is useful for reading wafers, examining keyways for stuck wafers and removing broken keys. Light weight, compact and sturdy with a special hardened steel construction, the OKS tension tools are an essential addition to the toolkit of any auto locksmith.

Features

- Double sided
- Suitable for use with different types of cylinders and wafers
