

## ASEC Vital Lever Short Backplate 122mm

### Description

---

These Short Backplate Levers from the Asec Vital range are multipoint lever handles on narrow backplates with 121mm screw fixing centers. Manufactured from aero grade aluminium, they have an Electrocoat+ finish for corrosion and UV resistance and the white version has a powder coated finish.

The levers have been salt spray tested for over 1,600 hours and radial bearing tested to over 200,000 operations so they are a reliable and durable choice of door furniture. They are compatible with most multipoint locking units and ideal for use with the Asec Vital Double Euro cylinders. Sold with a choice of long or short backplate, the levers are available in a variety of finishes and feature reversible handing for convenience.
