

ASEC Vital Lever Long Backplate 211mm

Description

These Long Backplate Levers from the Asec Vital range are multipoint lever handles on narrow backplates with 211mm screw fixing centers. Manufactured from aero grade aluminium, they have an Electrocoat+ finish for corrosion and UV resistance and the white version has a powder coated finish.

The levers have been salt spray tested for over 1,600 hours and radial bearing tested to over 200,000 operations so they are a reliable and durable choice of door furniture. They are compatible with most multipoint locking units and ideal for use with the Asec Vital Double Euro cylinders. Sold with a choice of long or short backplate, the levers are available in a variety of finishes and feature reversible handing for convenience.

92mm Centres

Operated By Euro
Cylinder

Reversible Handing
