

Description

The HomeStar range of safes from Chubbsafes provides an ideal choice of electronically locking domestic safe which is approved to Sold Secure Silver Level as well as Secured by Design (Police approved specification). With a £2k cash rating, Homestar safes are supplied complete with security screws, batteries and a removable shelf as standard.

These safes are suitable for base or rear fixing and they are fitted with an anti-tamper vibration alarm which is triggered by the safe being physically attacked or having 3 incorrect codes entered. All models in the HomeStar range are fitted with a motorised electronic lock which has a 2nd user function and an external emergency power connection. In common with other certified safes there is no key over ride.
