

CDVI MV Series Motorised Deadbolt Electric Rim Lock

Description

Ideal for use on heavy duty gates, doors and cages, this electric rim lock from CDVI is available either with or without manual override. It meets IP53 standards with nylon gears and varnished electronics, making it suitable for use outdoors and it has a 2 Year manufacturer's guarantee. Supplied with a round cylinder and 2 keys, these locks emit an audible signal to alert users if there is a locking error. This unit has been designed with fixings which are compatible with other similar locking devices making it ideal for retrofitting purposes.
