

WD-40 Specialist Anti Friction Dry PTFE Lubricant

Description

The Specialist Anti Friction Dry PTFE Lubricant from WD-40 is a specialist multipurpose dry lubricant with PTFE properties. Its anti friction formula makes it ideal for use on high-use mechanism that require regular protection from wear and tear, such as door and window tracks, power tools and lock mechanisms. It dries quickly into a clear film of dry lubricant which resists dust, dirt and oil, as well as making for an effective mould release agent. It is suitable for use on metal, glass and plastics and it comes with an applicator straw for precision spraying.

Features

- Won't attract dust, oil or dirt
- Quick dries to a clear film
- Lubricates with PTFE (Polytetrafluoroethylene)
