

WD-40 High Performance White Lithium Grease

Description

The High Performance White Lithium Grease from WD-40 helps to keep components moving smoothly and free of friction and seizing, as well as preventatively to protect against rust and corrosion. This product provides great protection for heavy duty, metal-to-metal applications (such as motor pivot points and bearings, pistons, chains, gardening tools and more) and it can be used outdoors regardless of weather and temperature conditions. The thick lithium grease solution is created with a high viscosity formula, meaning it won't drip or run.

Features

- Works well under extreme pressure, such as on load bearing connections
- Won't drip or run thanks to high viscosity formula
- Provides great long-term lubrication
