

WD-40 High Performance Silicone Lubricant

Description

The High Performance Silicone Lubricant from WD-40 is ideal for use on high pressure equipment and to extend the life of tools and components. It provides long lasting lubrication, helping to waterproof and protect against moisture which, in turn, helps to prevent rust and corrosion.

This high performance silicone lubricant spray will also resist dust, dirt and grime and it is specially developed to work in challenging conditions. Suitable for use on metal, wood, plastics and rubber; this product is non staining and the can is supplied with an applicator straw for precision spraying.

Features

- Eliminates parts from sticking and binding
- Prevents rust and corrosion
- Waterproofs and protects against moisture
