

## Description

The dormakaba (formerly known as Dorma) PHA 2111 Modular Push Pad is a single-point locking panic device to suit door widths up to 1000mm. This modular push pad can be used in conjunction with components of the dormakaba PHA 2000/3000 series and can be unlocked via electric strike if fitted.

This unit carries the CE mark and has been tested and certified compliant in accordance with EN 179 standards, meaning it is suitable for use on escape route doors in buildings with no public pedestrian traffic. Use of EN 179 is ideal for escape routes where it is expected that occupants are familiar with the exits and their fittings, avoiding the likelihood of a panic situation developing.

Complies to BS EN 179

## Reversible Handing
