

Description

The dormakaba (formerly known as Dorma) PHA three-point panic device to suit door widths up to 1000mm. This unit is fitted with top and bottom bolts and an antithrust latch to prevent the latch from being pushed back by unauthorised means when it is in the closed position.

This unit carries the CE mark and has been tested and certified compliant in accordance with EN 1125 standards, meaning it is suitable for use in public buildings where prior knowledge of how to open the escape door is not expected.

Complies to BS EN 1125

Reversible Handling

Features

- Non-handed design
- Dogging device holds the latches in retracted position so the door is freely accessible
- For fire and smoke check doors
- 3 x security anti-thrust latch
- Modular three-point locking unit
