

Description

The ED100 LE swing door operator from dormakaba (formerly known as Dorma) is a low energy solution to suit for both single and double-leaf applications. This energy saving door operator can be activated when necessary by way of a push pad and operated as a conventional manual swing door in all other cases. The modular design makes it easy to replace parts (rather than the whole unit) should the need arise. It has an adjustable latch action from 7° to 0° and an adjustable closing speed of a maximum of 27° per second.

Additional parts are required for successful installation.

Size 2 to 4

Adjustable Closing Action

Adjustable Latch Action

Fire Tested

Features

- Suitable for 60 minute fire rated doors
- Allows for manual door operation with push-pad activated assistance on demand
- To suit single or double-leaf swing doors
- Electronic latching for efficient door closing
- Low noise levels achieved via multi-stage gearing
- Modular low energy electromechanical swing door operator
