

Description

This EXIDOR 402 Touch Bar Panic Bolt is surface mounted and suitable for wooden or steel, single and double door applications, including fire doors. The patented lip prevents accidental jamming, and two point locking, plus the vertical Pullman latches, provides increased security, with a smooth latching action. It is supplied with timber fittings.

Complies to BS EN 1125

Reversible Handing

Features

- Vertical Pullman latches for smooth latching action
- Two point locking for additional security
- Suitable for fire doors
- Surface mounted
- CE marked for safety
- Suitable for doors up to 900mm wide
