

Description

The TR68 Plug & Play Tracker from Bulldog is ideal for monitoring the progress and location of vehicles and fleets. The TR68 is easily installed through a simple plug in using your OBD socket and it can be moved from vehicle to vehicle. The tracker allows you to monitor progress via the app and receive push notifications directly to your phone as well as monitoring driver behaviour and compliance. Speed, live location and signal strength can be viewed at a glance, and the app will also generate reports for review.
