

Description

This ground anchoring chain lock from Bulldog has a 1.83m (6ft) chain length and features a pear link end which allows the chain to pass through itself, creating a fully adjustable link. The MC100S can be secured either with recessed cup to fit onto Bulldog Super Lock Bolt for use as a portable secure loop, or with the lock tube supplied in the kit which can be secured in the ground/floor to offer a permanent anchor position within areas such as a garage, driveway or workshop. Use of a red woven fabric sleeving provides visibility and protection and the unit is supplied complete with the Bulldog Super Lock Bolt which has over one million possible key combinations.
