# CODELOCKS Kitlock KL10 Mechanical Lock

Description

This CODELOCKS Kitlock KL10 Mechanical Lock offers easy mechanical keyless access and is suitable for a variety of internal applications, including lockers, cabinets and cupboards. It is easy to install as part of a new or retrofit installation and comes with a straight cam, hex nut and screw. There are over 10,000 unique 4 digit code combinations available and the code can be changed conveniently whilst the lock is in place on the door.

This lock is supplied pre-programmed for use in private function, where the same code will be used repeatedly such as on a cupboard or drawer. It also offers a code retrieval function using a master key (sold separately), enabling the code to be retrieved if forgotten, or if emergency access is required.

A public function version of this lock is available as a special order item, which is when a single use code is set. Once it has been opened the code is automatically erased ready to be set by the next user and is ideal for hot desking in an office. Please contact the specials department if you require the public function version.

Clean by Codelocks is an optional finish available to special order on many Codelock products. The clear coating combats SARS-CoV-2 coronavirus (COVID-19) and can reduce bacterial growth by 99.96%*, providing an additional measure of protection over sanitisation. Clean by Codelocks features an ISO certified photocatalytic coating which offers enhanced protection against viruses, bacteria, germs and other environmental toxins. For full details please view the data sheet in the associated documents or to order please contact our Specials Department.

Supplied With No Keys

Combination Mechanism

Key Override Facility
