

## ADVANCED DIAGNOSTICS ADC2010 OBD 4 - 5 Pin Adapter

### Description

---

The ADC2010 from Advanced Diagnostics is an OBD 4 - 5 Pin Adapter manufactured for use with the Smart Pro programming device, which supports various makes of vehicles where ground wires are not populated correctly at the OBD socket. It is designed to bridge the ground wires at the OBD connector socket, which some manufacturers may wire independently. The Smart Pro may display a lower than normal battery voltage when these lines are not populated in the OBD socket, and may also have communication issues - this can be rectified by connecting the ADC2010 adapter.

### Features

---

- To suit Smart Pro
- 4- 5 pin adaptor
- Black finish
