

## ASEC Yale G2000 Copy Lever Operated Latch & Hookbolt Twin Spindle Gearbox

### Description

---

This ASEC Yale G2000 Copy Lever Operated Latch & Hookbolt Twin Spindle Gearbox is suitable for Yale G2000 series multipoint locks. The twin spindle gearbox is operated by lifting the lever to engage locking mechanisms and one full turn of the cylinder to lock, and one full turn of the key then push down on the lever to unlock. It is an ideal solution when the centre case gearbox is the only component which needs replacing within the locking mechanism.

35mm Backset

92/62mm Centres

Operated By Euro  
Cylinder

Reversible Handing

### Features

---
