

MASTER LOCK Internal Bluetooth Padlock For Business Applications

Description

This MASTER LOCK Internal Bluetooth Padlock is designed for use with many locks and many users, making it ideal for business applications. Never worry about forgetting your key or combination again with this convenient, simple and secure keyless access padlock. The free Master Lock Vault Enterprise app available for both Android and iOS devices is easy to use and allows for sharing access with other users, temporarily or permanently, and quick and easy access to robust data and audit trails.

This padlock comes with an easy to replace CR2450 battery and notifies the user via the app and on the padlock when the battery is running low. With a boron carbide shackle you can rest easy knowing that your padlock has a high resistance against both bolt cutter and prying attacks. The padlock is not weatherproof and is therefore suitable for indoor use only.

Works With An App
