

Description

The LOCINOX Vinci Surface Mounted Mechanical Code Gate Lock features a fully mechanical code panel on both sides, with no batteries or electric required. The stainless steel mechanism has aluminium housing and a polyamide rain and dust cover, with an ISO 9227 KTL / E-coated lock box which withstands 1000 hours salt spray testing, ensuring optimum weather resistance.

The gate lock is user friendly with fast and simple set up and modification of the access codes and automatic code reset after pushing the handle. It is reversible to suit both left handed and right handed gate applications and is interchangeable with all Locinox locks. It has 20mm continuous adjustability to ensure perfect closing. It is locked by 23mm throw of the deadbolt by turn of the key and comes complete with a 3 year guarantee.
