

## MILA Pro Secure PAS24 2 Star 240mm Lever/Lever Door Furniture

### Description

The MILA Pro Secure handle range is Secured by Design (Police approved specification). It combines visible security features with concealed reinforcement technology therefore providing ideal protection against cylinder and handle snapping. It is suitable for UPVC, composite, GRP and timber doors. Alongside the anti-drill, anti-grip and anti-snap technology, a deep-drawn steel subframe inside the zinc alloy backplate provides reinforcement for extra strength and stability.

The handle has been successfully tested to TS007:2012 and has achieved BSI's two star Kitemark™ accreditation, plus it has been tested to BSEN1906: Grade 4, successfully achieving 200,00 cycles.
